RE: Letter of Reference – OreTest Drilling

To Whom It May Concern,

Minera Titan S.A. De C.V. a wholly own subsidiary of Levon Resources Ltd gladly offers a letter of recommendation for OreTest Drilling as a high quality and reliable contractor who gets the job done on time and with high professional and performance standards and good, well maintained equipment. We have worked with OreTest at Cordero for the last four months at running two core drills 24/7 with two weeks off for Christmas/New Years.

OreTest has performed very well, working with us closely to assure our planned drill holes were properly located and rapidly drilled with 100% core recovery as possible. We helped train the crews to mark the core to our specifications and worked through the normal training issues with no problems.

Oretest field supervisor staff is exceptional 24/7 to meet the project needs and not waste time or money.

Oretest is very much a quality and performance oriented company who we depend on and can trust in what they say and do. At Cordero we demand the highest industry standards be met, particularly in the drilling since that is where our database all starts. OreTest has met these standards.

Levon has worked with Mr. Bart Forsythe, OreTest owner for several years in the past during the Cordero early discovery stage, when he owned another drilling company. Based on his quality performance then Levon sought him out to complete the latest round of drilling at winning bid prices, and we are gratified with our choice and OreTest performance. Dependability and quality is what Levon seeks and what OreTest has delivered for us.

We will seek out OreTest, working with Mr. Forsythe on any future drilling contracts, without hesitation.

Regards,

C. Victor Chevillon
